

# Farm Machinery Operator

Seeking a farm machinery operator who would assist with the equipment maintenance, repairs, and field operations on a progressive corn and soybean farm in Yorkville, Illinois.

Responsibilities would include:

- Assist with field work activities on the farm including tillage work, planting, spraying, and harvesting
- Assist with input tendering and grain hauling with semi-tractor trailers
- Maintain adequate cleanliness of equipment, shop, and workspaces
- Assist in overall farm safety program

Desired qualifications:

- High School diploma
- Work experience on a farming operation
- General knowledge of equipment maintenance
- A good driving record and currently holding Class A CDL.
- Experience with operating various farm equipment, which may include combines, planters, sprayers, and/or tillage equipment
- Familiarity with precision agricultural equipment

Compensation:

- Salary commensurate with responsibilities and experience, starting at \$60,000/year
- Bonus possible based on performance of both this position and the company as a whole

Benefits:

- Paid vacation and holidays
- Health insurance stipend
- Company provided mobile phone stipend
- Company provided training and educational programs
- Gain hands-on experience in all aspects of a progressive and innovative farm

General Comments:

- This farm machinery operator must be hands-on and willing to assist with the various activities of this farm operation.
- Applicant must be willing to be away from home during the planting and harvest seasons.
